Innovation Potential Assessment

About the Assessment

May, 2024

To recruit, attract and retain innovation talent, organizations should recruit by innovation behaviors, identify their innovators, and put their Aces in the right places

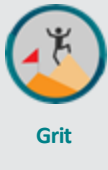

Recruit by innovation behaviors...

Innovation Mindset

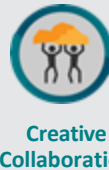

Do they have the right mindset?

Growth
Mindset

Grit

Creative
Collaboration

Flexible
Execution

Innovation Knowledge & Tools

Do they have the knowledge & tools?

Intent

Concepts

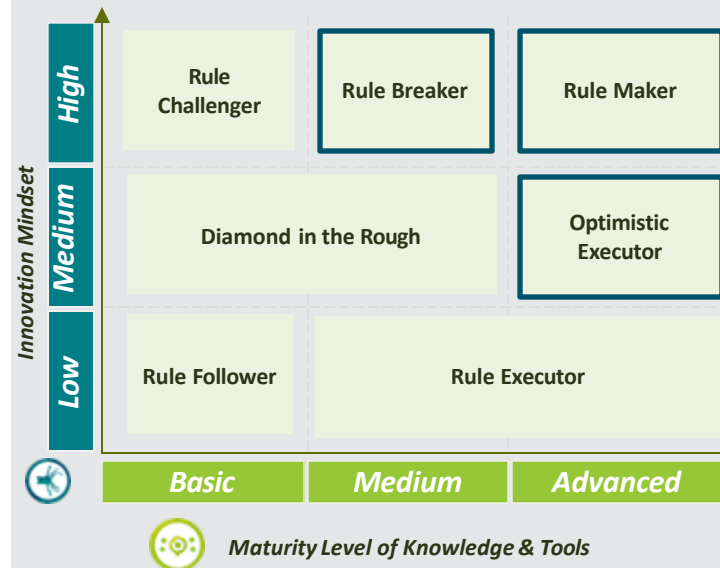

Resources

Make it Real

Identify your innovators...

Innovation Profiles

Put your Aces in the right places

Lead innovation projects

Join innovation team

Get trained on innovation

The Innovation Potential Assessment helps HR and Innovation Managers start innovation by evaluating their talent to get quantitative understanding of their resources and then put their aces in the right places

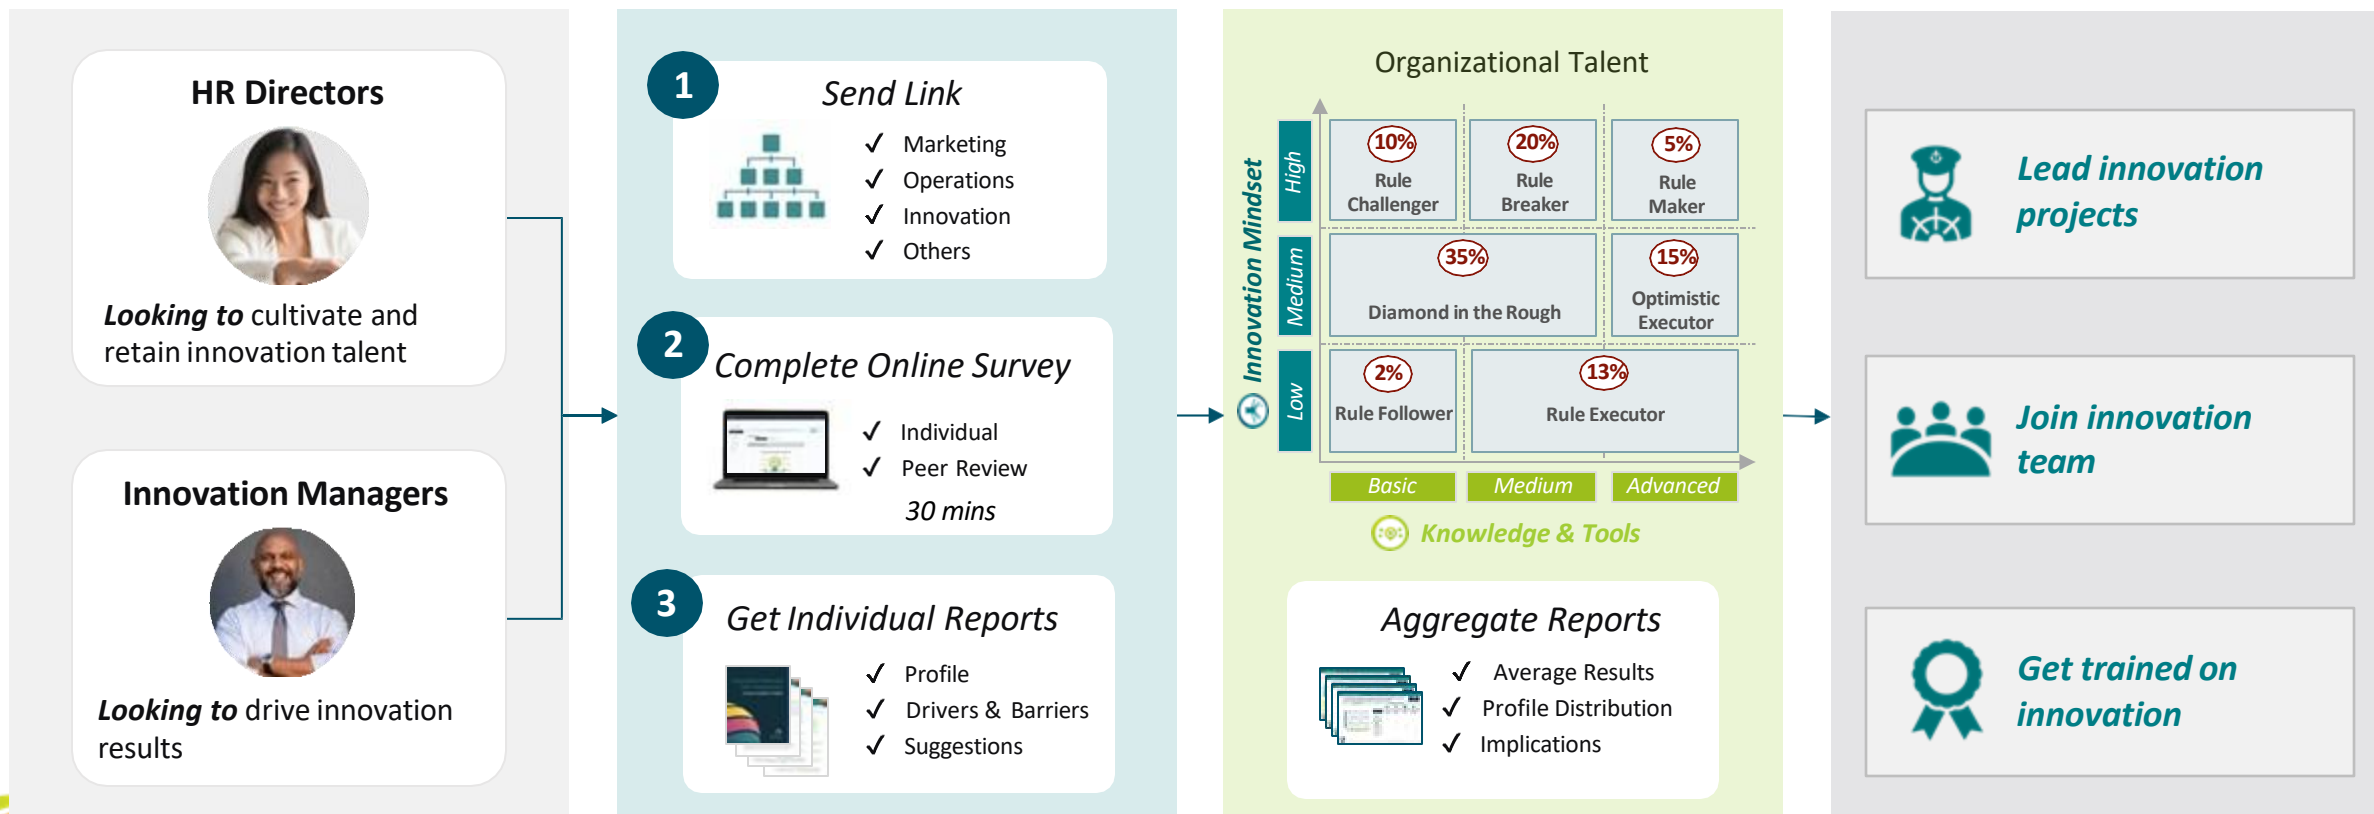

Innovation Potential Assessment

Start innovation

➡ By evaluating your talent

➡ To get a quantitative understanding of your resources

➡ And then put your Aces in the right places

The Innovation Potential Assessment helps organizations safeguard their companies from disruptions by helping them in evaluating the innovation skills and behaviors of their talent that will drive results

For Whom?

HR departments, innovation managers, and teams who want to safeguard their companies from disruptions

HR Departments

Innovation Managers

Management Teams

Ambitious Individuals

Why?

Talent is what will make innovation real, yet most companies are recruiting for technical skills rather than innovation skills and behaviors

What are the benefits?

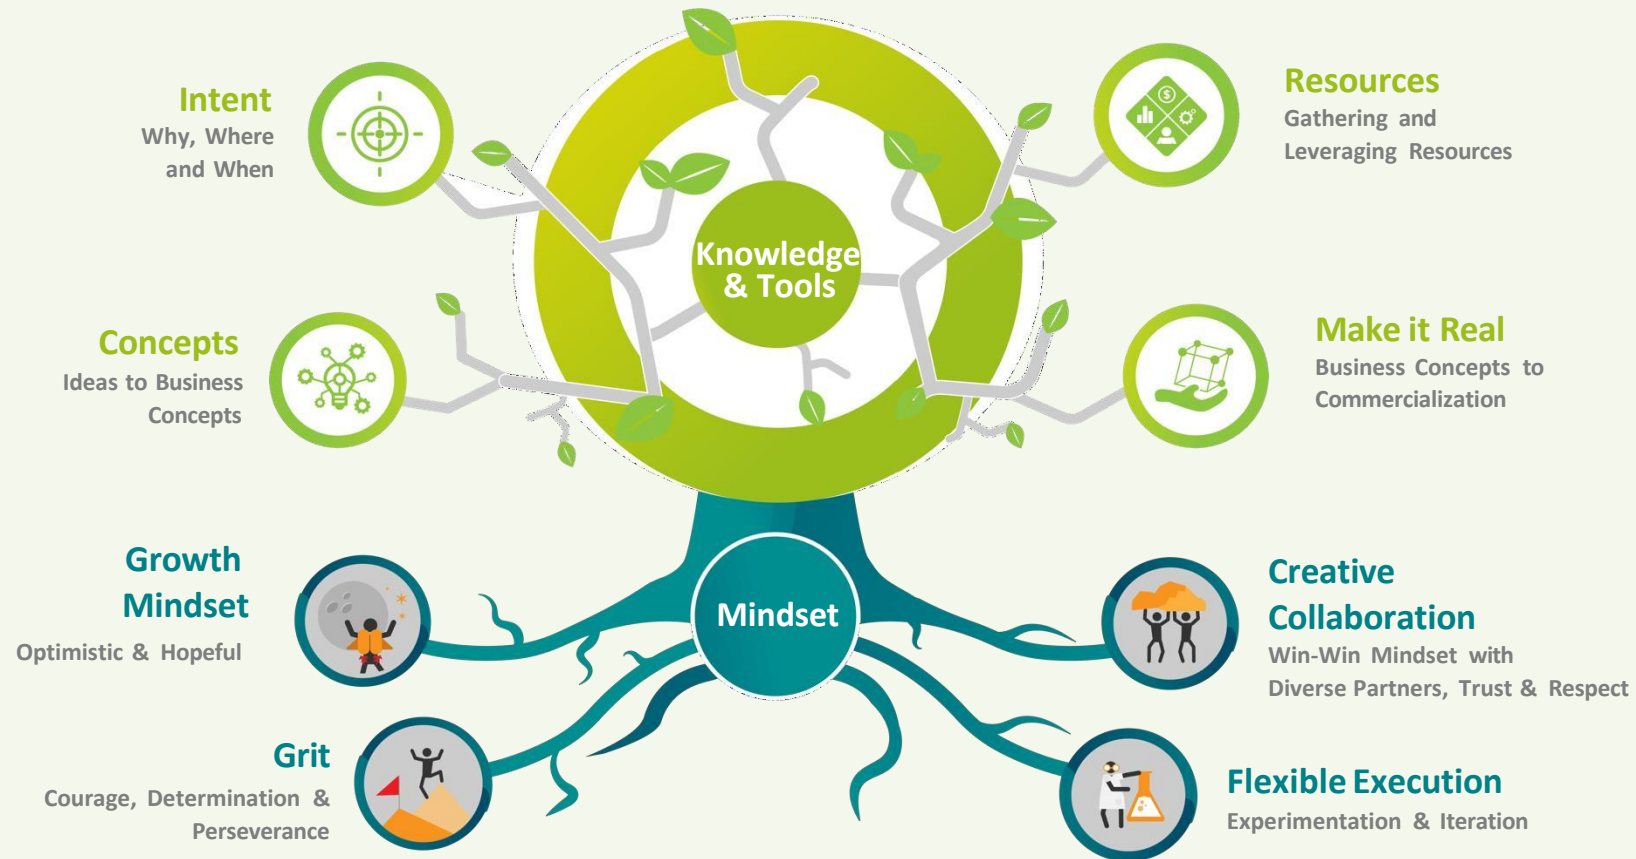

- Understand relative strengths and weaknesses and identify and prioritize improvement areas to act upon
- Identify the expected and desired outcomes which the individual or company can target and achieve

What is the cost if you don't embrace this?

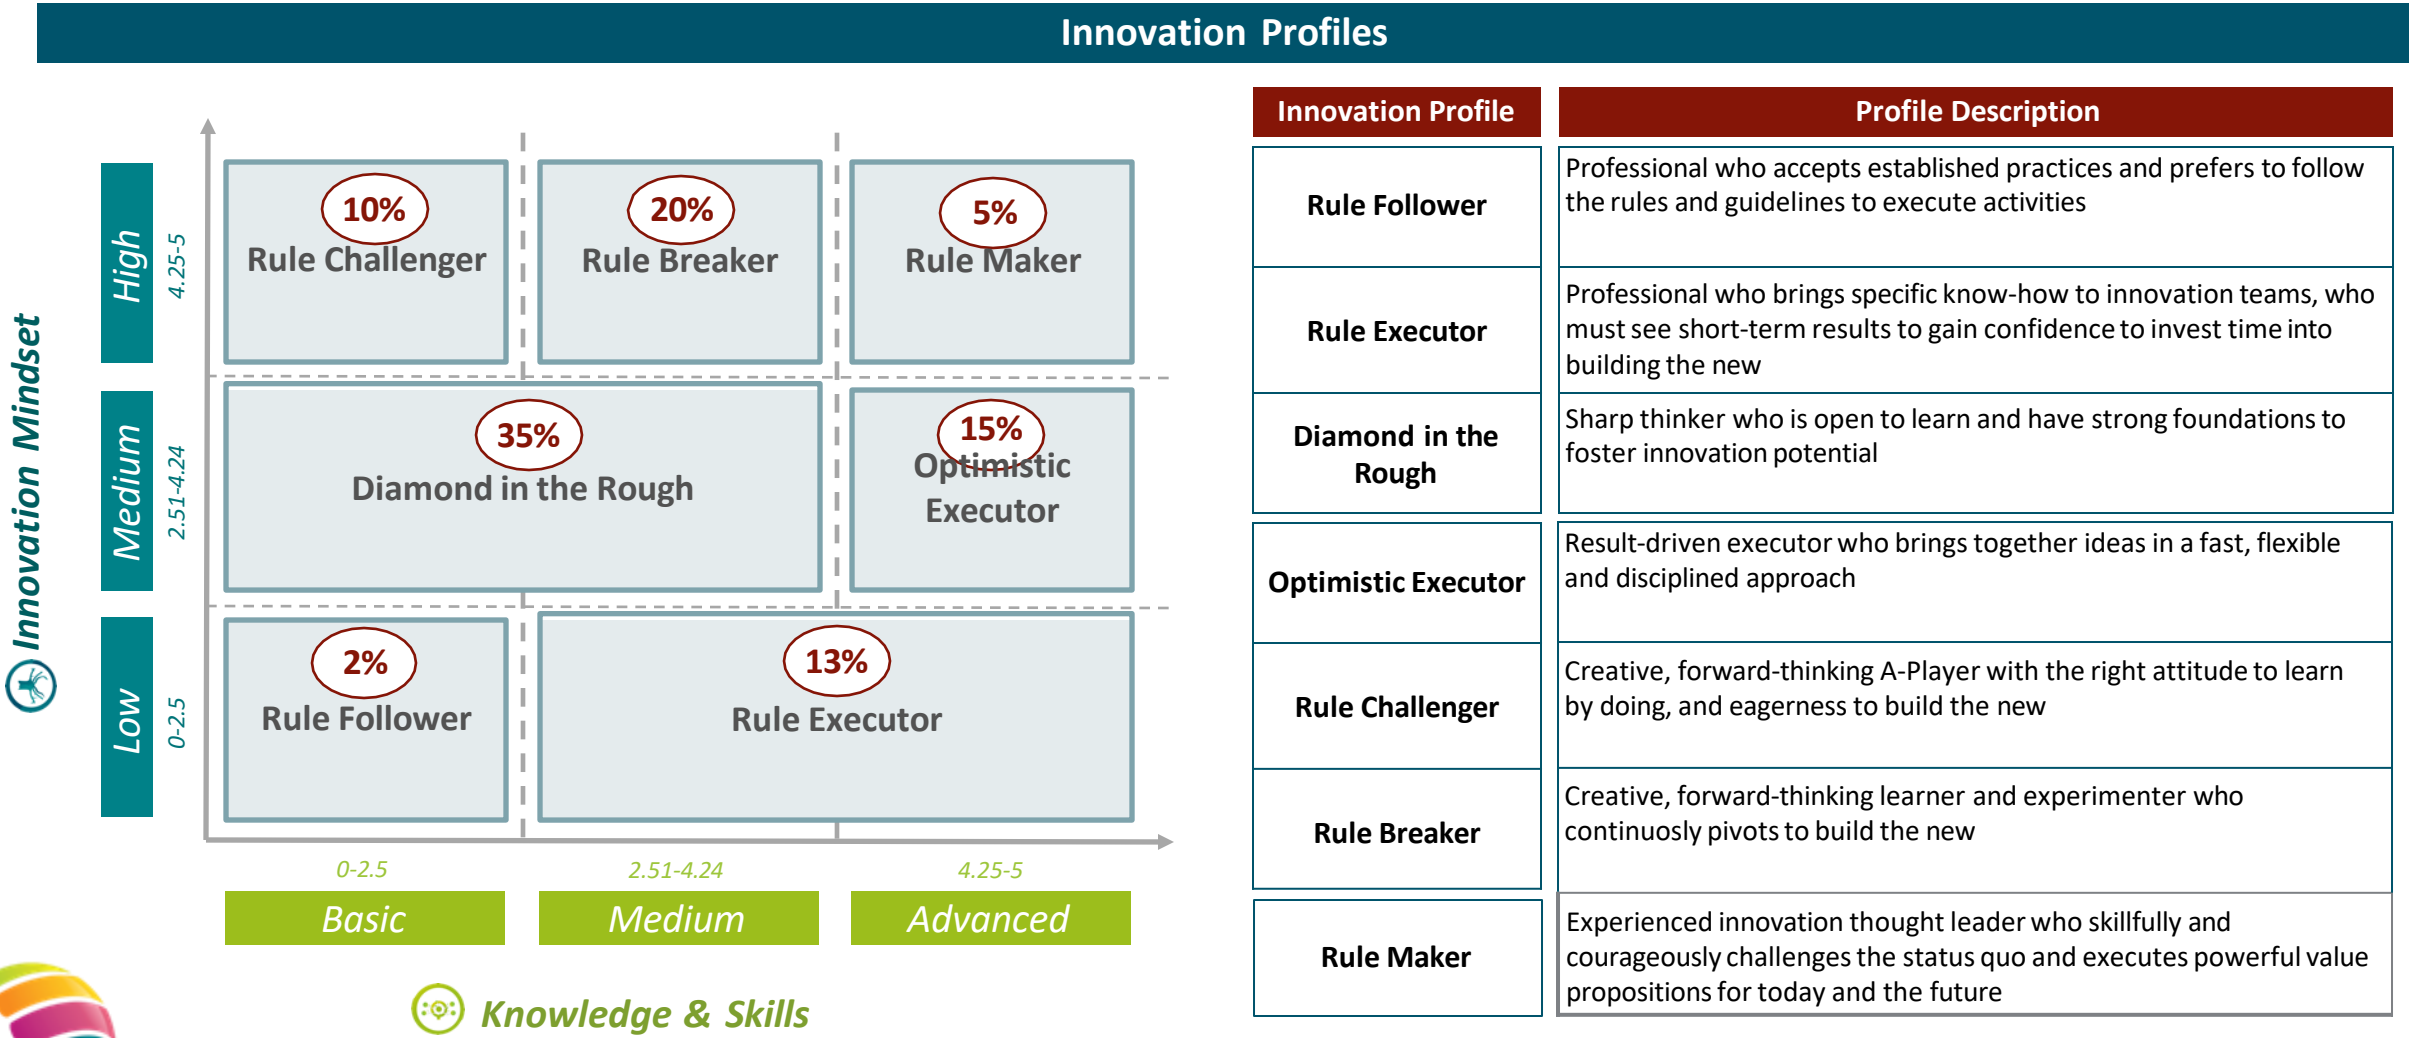

- Fail when you can't keep up with competitive pressure and constant change
- Fail due to misunderstanding of strengths and weaknesses to achieve leadership excellence and survival

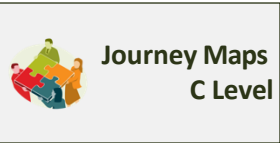

The innovation potential of individuals is determined by their (1) innovation mindset and mastery of (2) knowledge & tools for driving innovative results

Framework

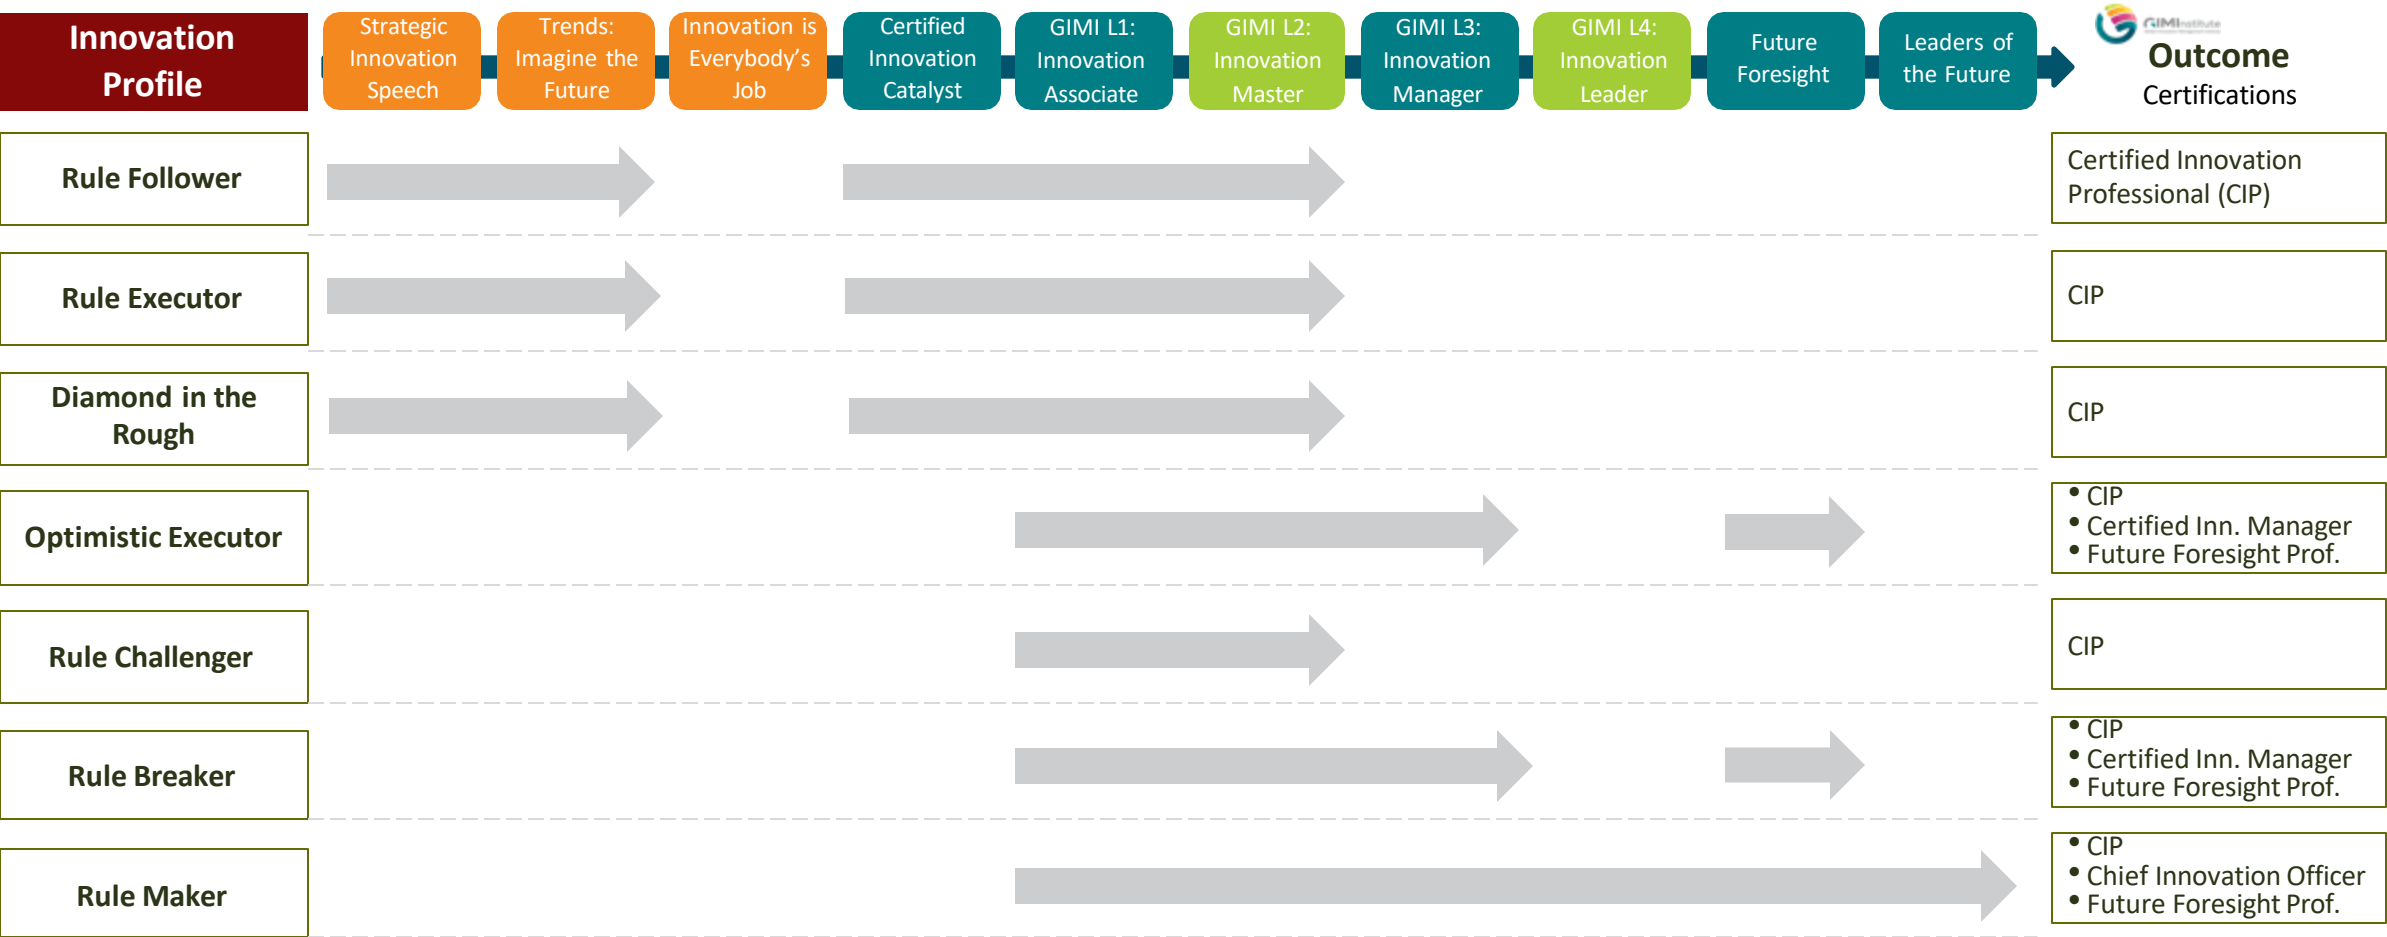

The combination of Mindset and Knowledge & Tools levels characterizes individuals into one of seven innovation profiles

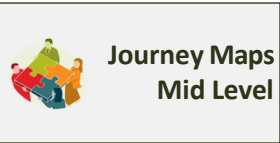

We have a customized learning journey for every innovation profile and C-level position , focused on jumpstarting innovation, building capability, and driving results

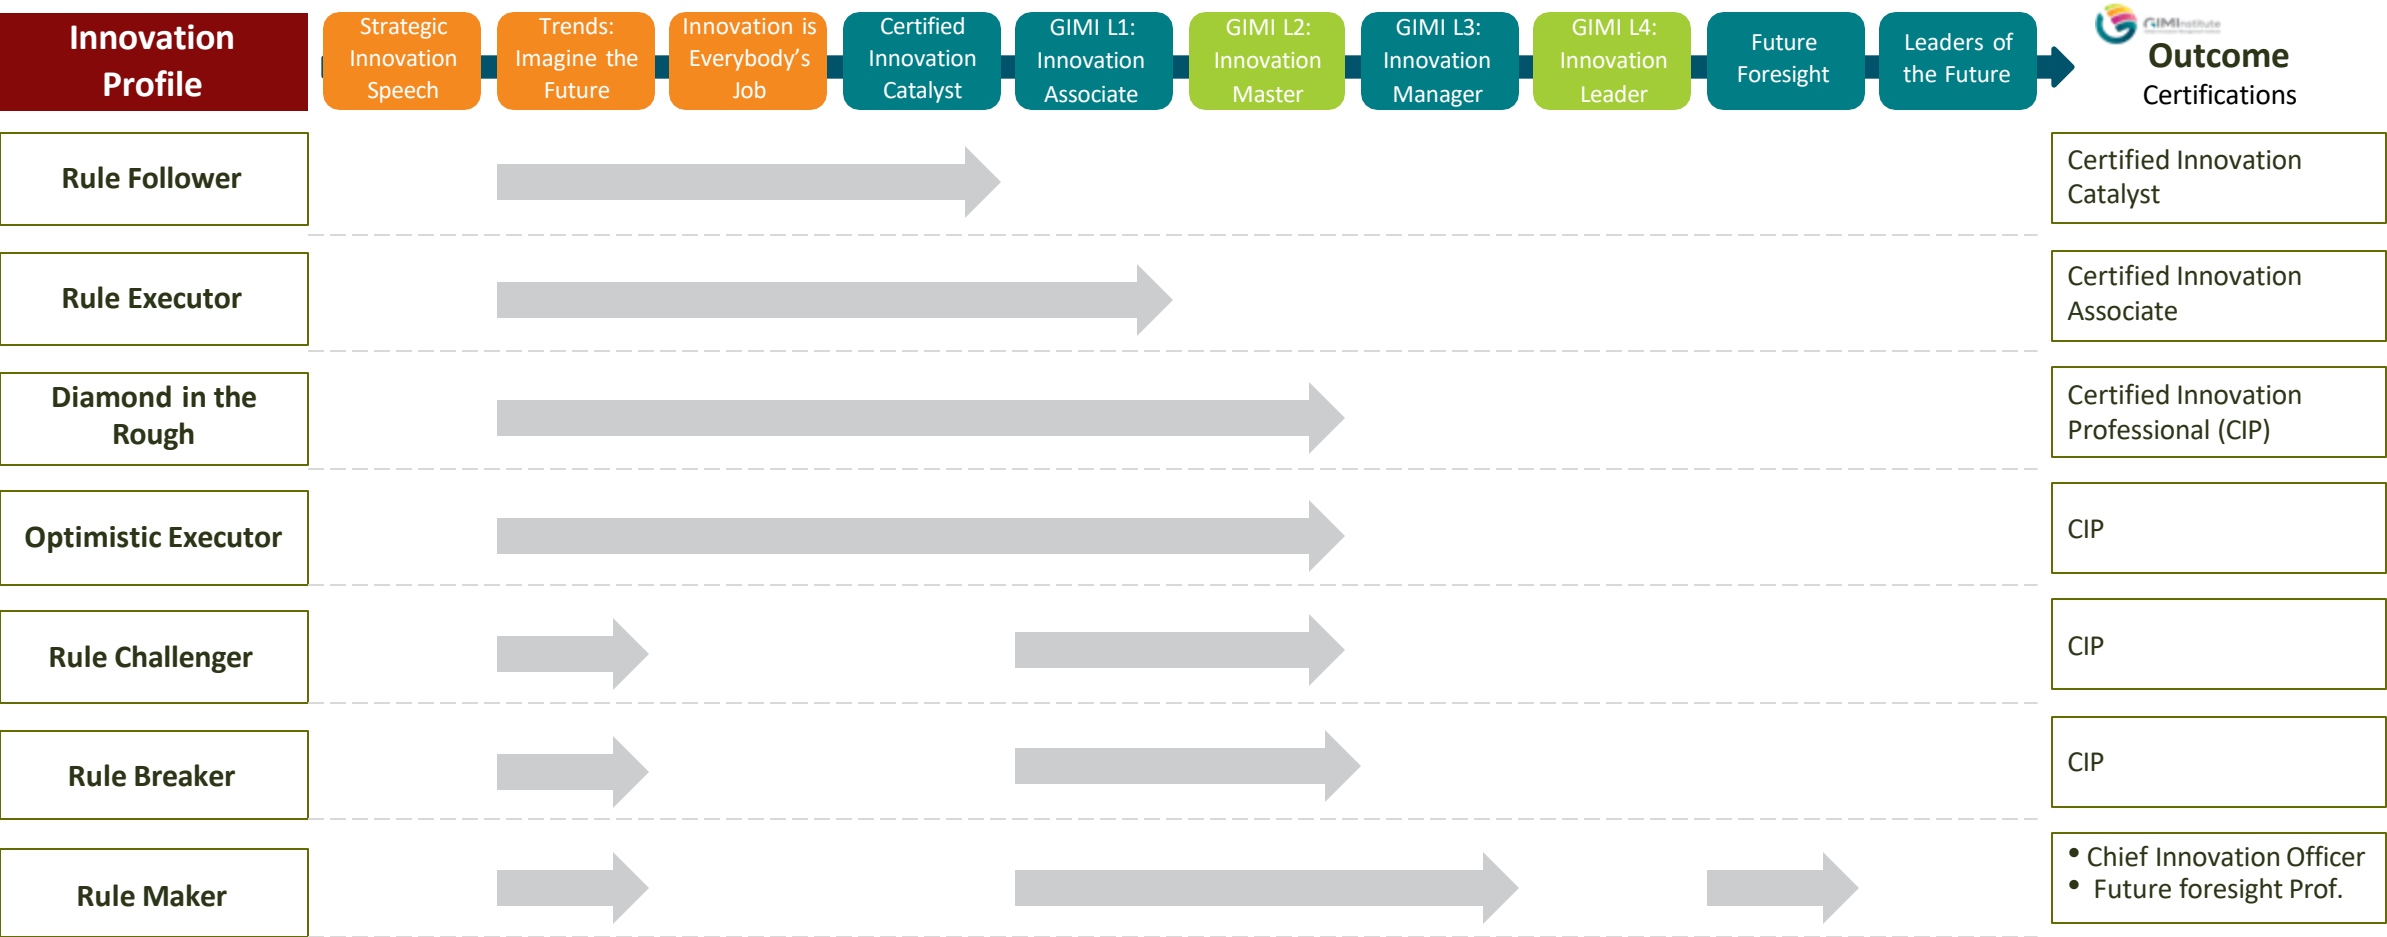

Journey Maps for Innovation Profiles – C Level Positions

We have a customized learning journey for every innovation profile and mid level positions, focused on jumpstarting innovation, building capability, and driving results

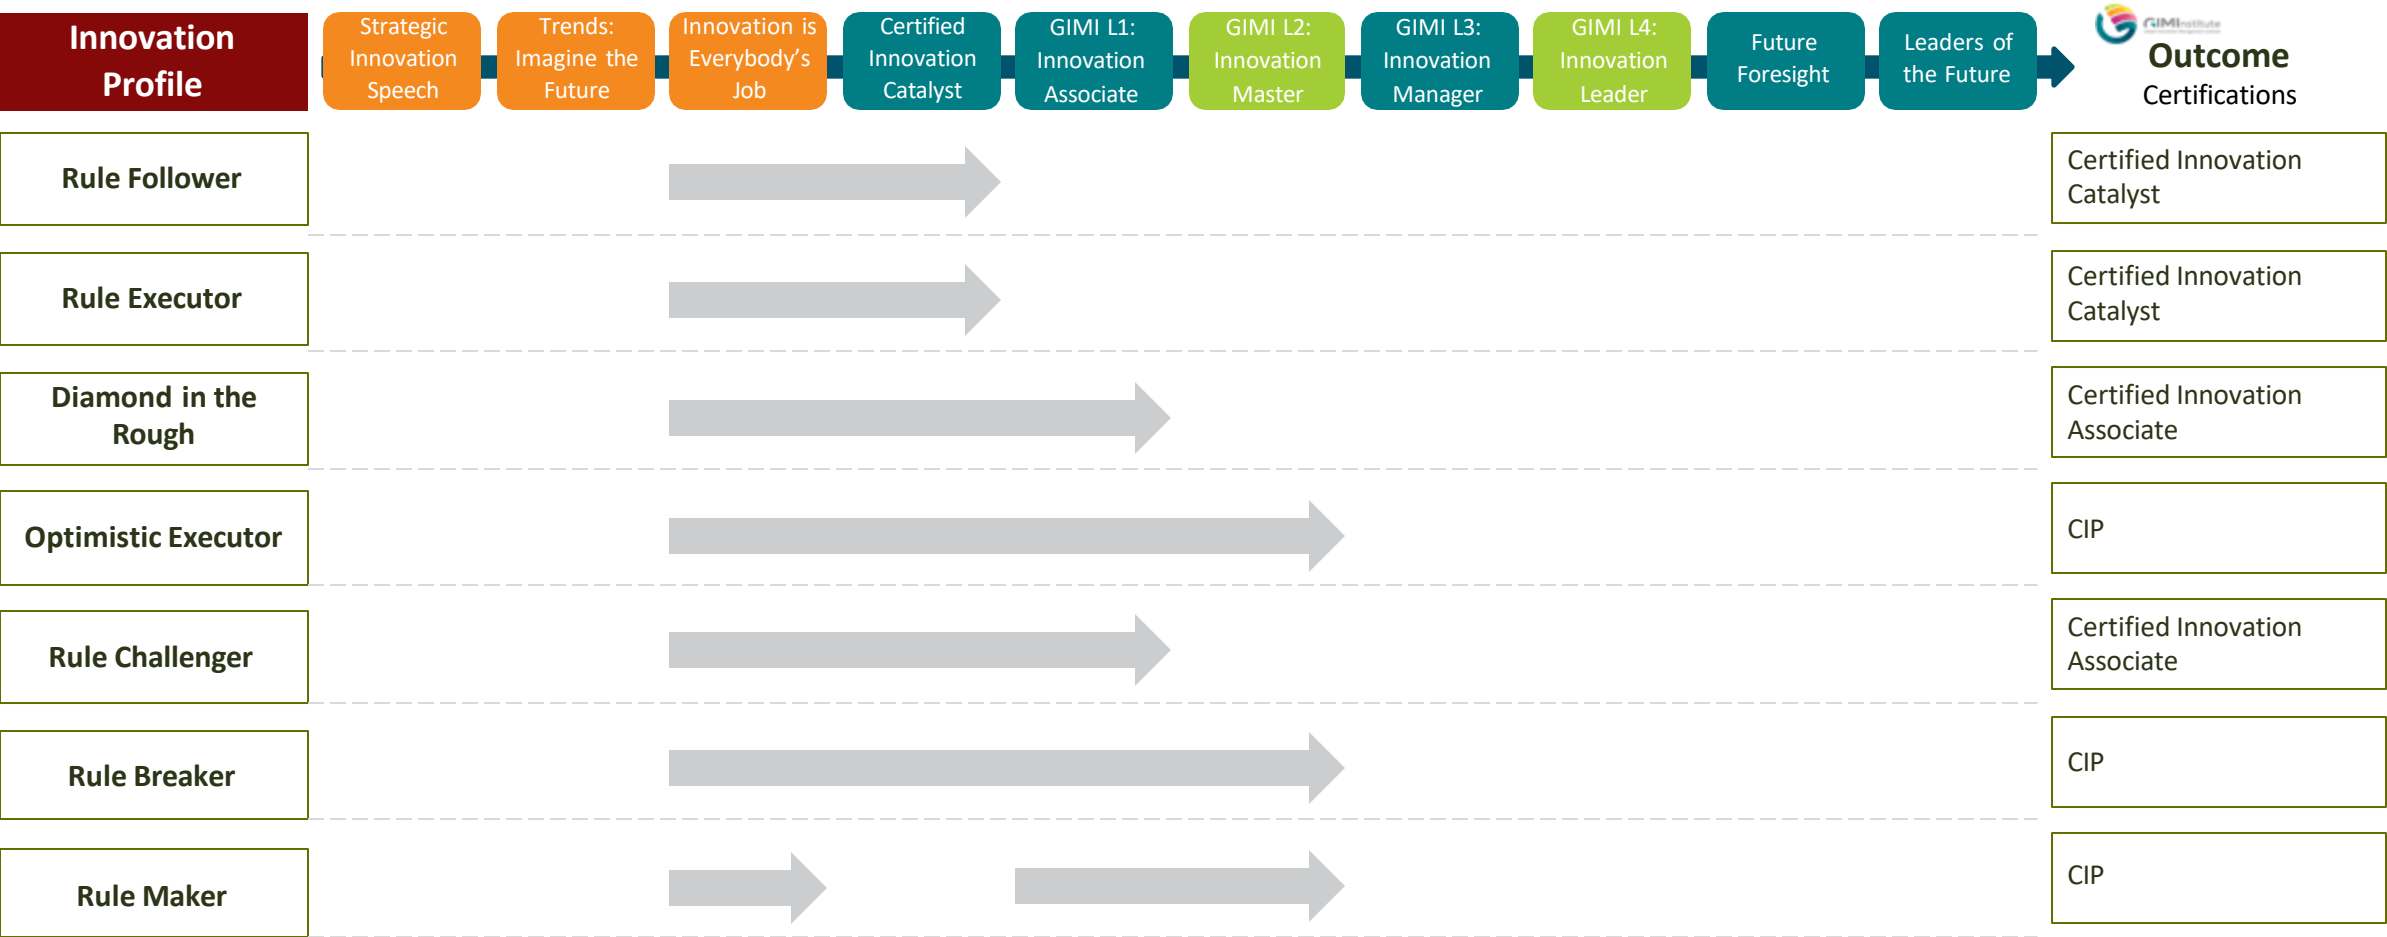

Journey Maps for Innovation Profiles – Mid Level Positions

We have a customized learning journey for every innovation profile and junior positions, focused on jumpstarting innovation, building capability, and driving results

Journey Maps for Innovation Profiles – Junior Positions

Focus: Jumpstarting Innovation Capability Building Breakthrough Results

Based on the Self-Assessment answers, individuals automatically access their personalized report that includes their innovation mindset and know-how maturity, innovation profile, and suggestions to pursue

Individual Report

The individual report includes the following components:

Innovation Mindset Results

- General Results
- Results by subcomponents
Growth Mindset, Grit, Creative Collaboration and Flexible Execution
- Innovation Mindset Drivers, Enablers and Barriers

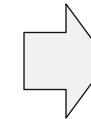

Knowledge & Tools Results

- General Results
- Results by subcomponents
Intent, Concepts, Resources and Make it Real
- Knowledge & Tools Drivers, Enablers and Barriers

Innovation Profile & Suggestions to pursue

- Map Innovation Profile based on self-assessment results
- Characterization of Innovation Profiles
- Suggestions and trainings to pursue to become better innovators

Illustrative

Organizations that assess groups of employees can identify the individuals who can be assigned immediately to innovation teams and the ones who need training to become better practitioners

Aggregate Report

The aggregate report includes the following components:

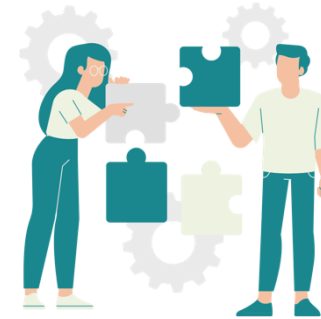

Aggregate Innovation Potential Results

- Company-wide average scores for Innovation Mindset and Knowledge & Tools
- Top insights on the drivers, enablers and barriers to drive innovation forward at company level

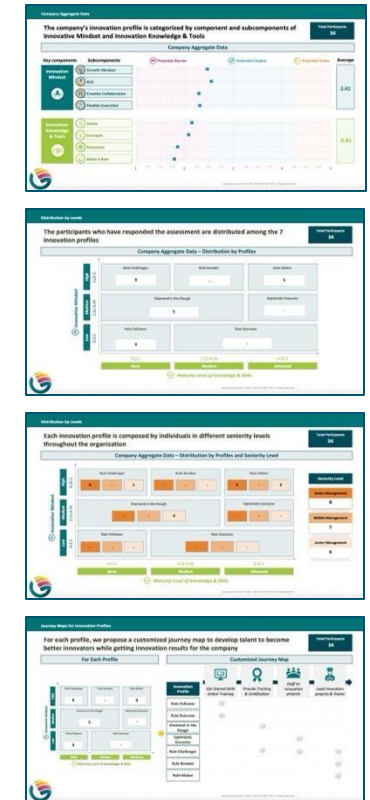

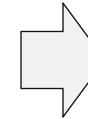

Customized Results (Optional)

- Results & recommendations by departments, roles or seniority
- Results & recommendations by any segmentation required by the company

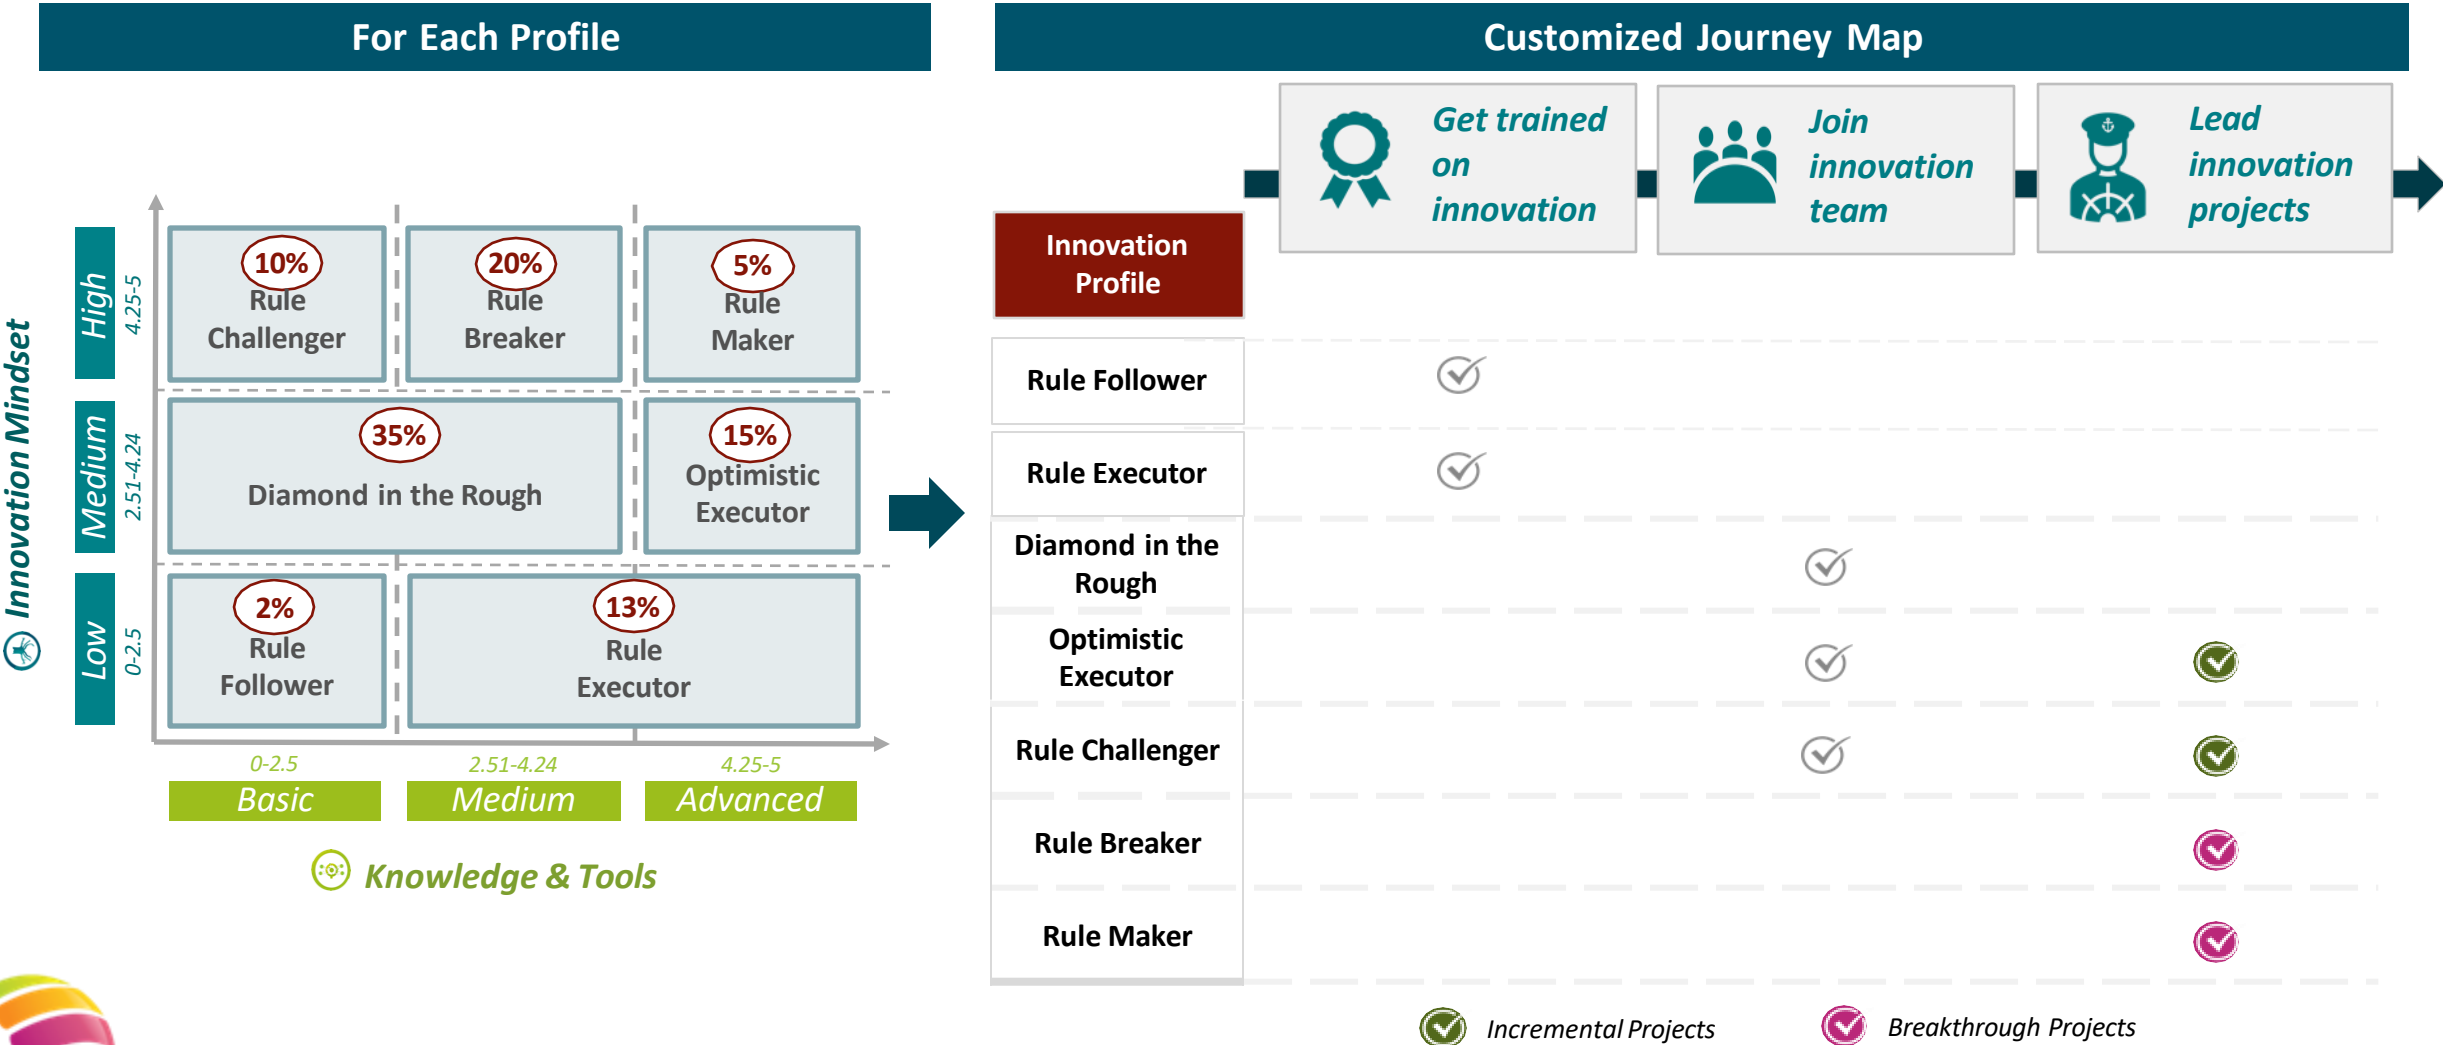

Pre-Selection of Groups to Train

- Customized journey maps to develop talent based on results
- Suggestion of ideal development plan based on company needs

Illustrative

For each profile, a customized journey map is built to develop talent to become better innovators while getting innovation results for the company
