GIMI-ISO 56001

General Overview

2024

GIMI and IAOIP were the pioneers of innovation fundamental and frameworks and have been working with organizational assessments and audit for over a decade before and during ISO 56000 development

After acquiring IAOIP, GIMI became the largest innovation certification organization in the world and is now driving the Global ISO Innovation Management Standards

Founders of the US ISO Tag for Innovation Management

Hitendra Patel,
CEO

**Innovation
management
Fundamentals
& vocabulary**

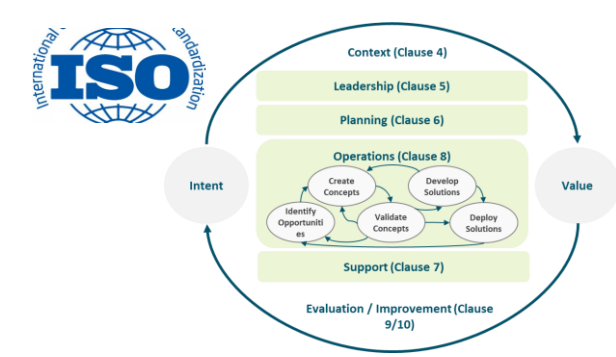

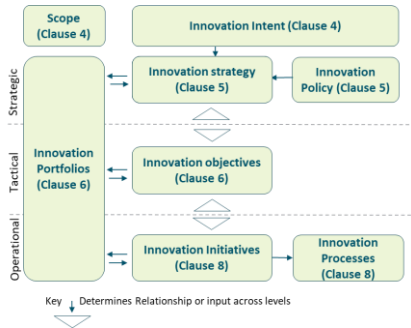

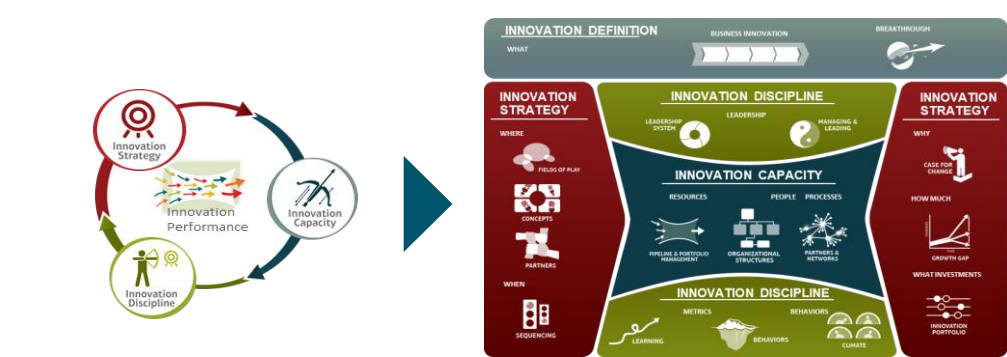

Brett Trusko,
Board Chairman

- GIMI is **first and largest** Organizational Innovation Certification Organization
- IAOIP is the **US Committee founder** for **ISO 279** - Innovation Management
- Both CEOs serve as technical members on the U.S. team developing the new ISO 56000 series for Innovation Management
- GIMI is the **only certification body accredited by ISO 17024** and has a framework **endorsed as ISO+**
- GIMI is the pre-eminent body in organizational assessments and has already certified 500+ organizations

GIMI-IAOIP enables organizations to understand their current maturity through its assessment and audit products leveraging both these standards

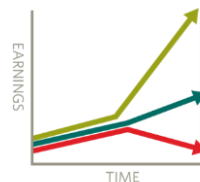

1 ISO only Audit 2 ISO + GIMI Audit

Supporting Framework	 	
Salient Features	 Self declaration / Assessment  Identify gaps  Leverage internal teams	 Benchmark driven  Recommendations & Roadmap to close gaps  Executive advisors & Expert access
Advantages	- Easier to implement and faster alternative to identify gaps - Cheaper alternative - Obtain the WHATs	- More robust and benchmark driven - Help align and engage across stakeholders and functional groups - Obtain recommendations and roadmap and required implementation support - Obtain the WHAT & HOW with best practices from 500+ certified organizations

Organizations who are having ongoing innovation efforts and are looking for simple and quick way to drive standardization and/or need ISO certification for compliance

1 For Whom & Why

Organizations, government or business units across sectors that have mature innovation process and want the ISO 56001 certification merely to address compliance needs of government or customers

3 How (Approach)

1. Online Assessment

Assessment Scorecard

2. Evidence

Internal Documents

3. AI generated recommendation

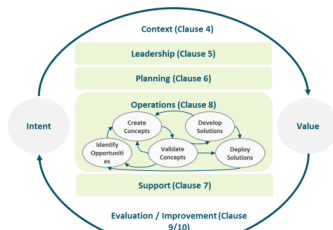

Strategic Actions

With a structured process, we assess the current innovation state and relevant evidence to identify maturity level, main gaps, and AI generated roadmap for improvement

2 What (Methodology)

Key components

ISO's PDCA Framework focuses on Planning, Doing, Checking and Acting elements of an Innovation system which form basis of ISO certification

Gaps to achieve ISO or ISO certificate

4 Results

1. Current Innovation Level

2. Closing the Gap

The results include a comprehensive report covering three main areas: Gap Analysis, Innovation Roadmap and ISO certificate if applicable

ISO assessment allows organizations to assess a checklist & identify elements of the innovation management system which they need to address making it a great source to get started

For Whom?

Organizations, government or business units across sectors that have mature innovation process and want the ISO 56001 certification merely to address compliance needs of government or customers

*Business Units early
in innovation journey*

Public Organizations

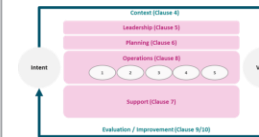

Corporates

Why?

Why Do an Assessment?

Is your organization ready to innovate?

Assess and understand your organization's current state of innovation

Do you know what your organization's main gaps are?

Identify gaps and areas for improvement to bridge distance between your current and desired innovation levels

Do you know how to close the gaps?

Discover an AI generated improvement punch list to close the identified gaps

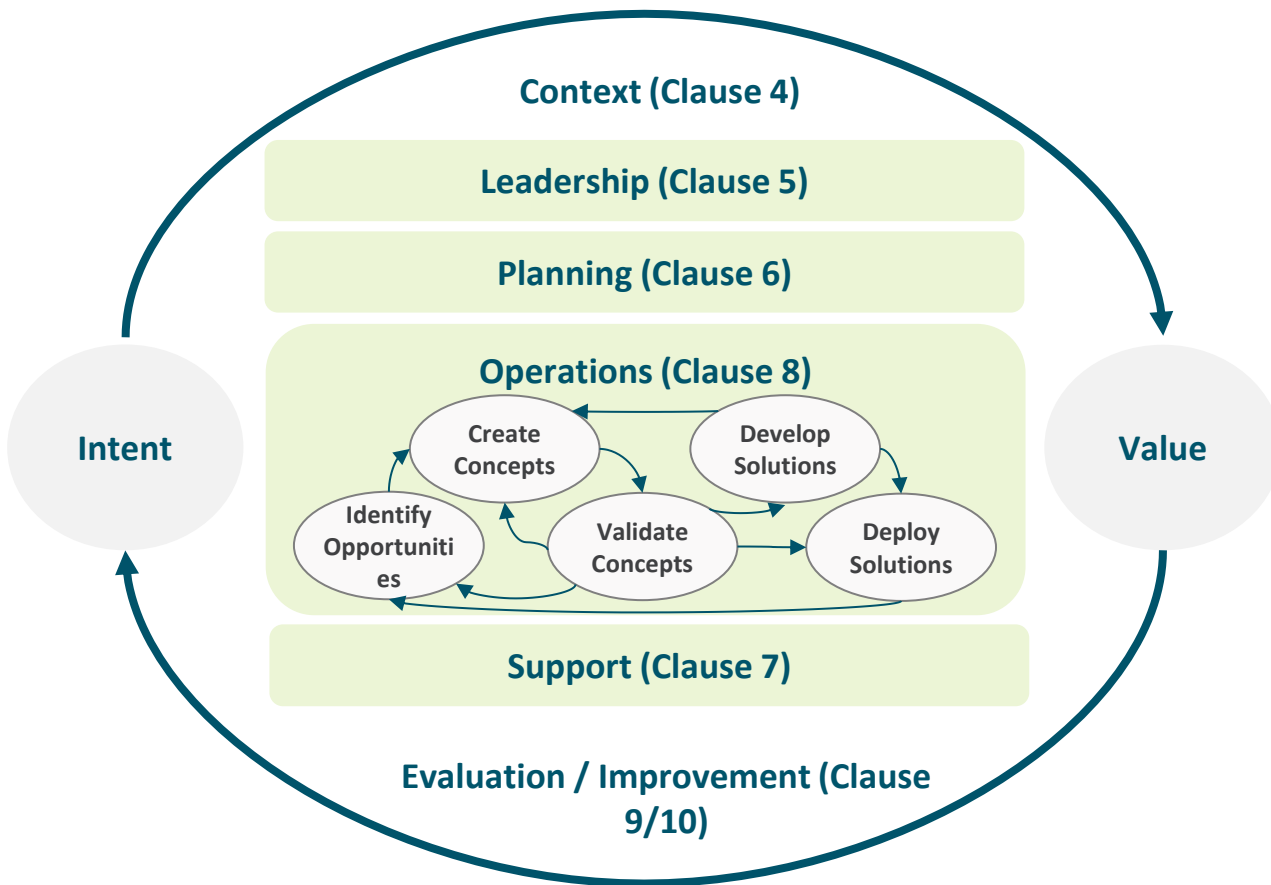

Do you want to be compliant to ISO and receive ISO certification?

Enable the organization to be ISO compliant and obtain the ISO 56001 certification

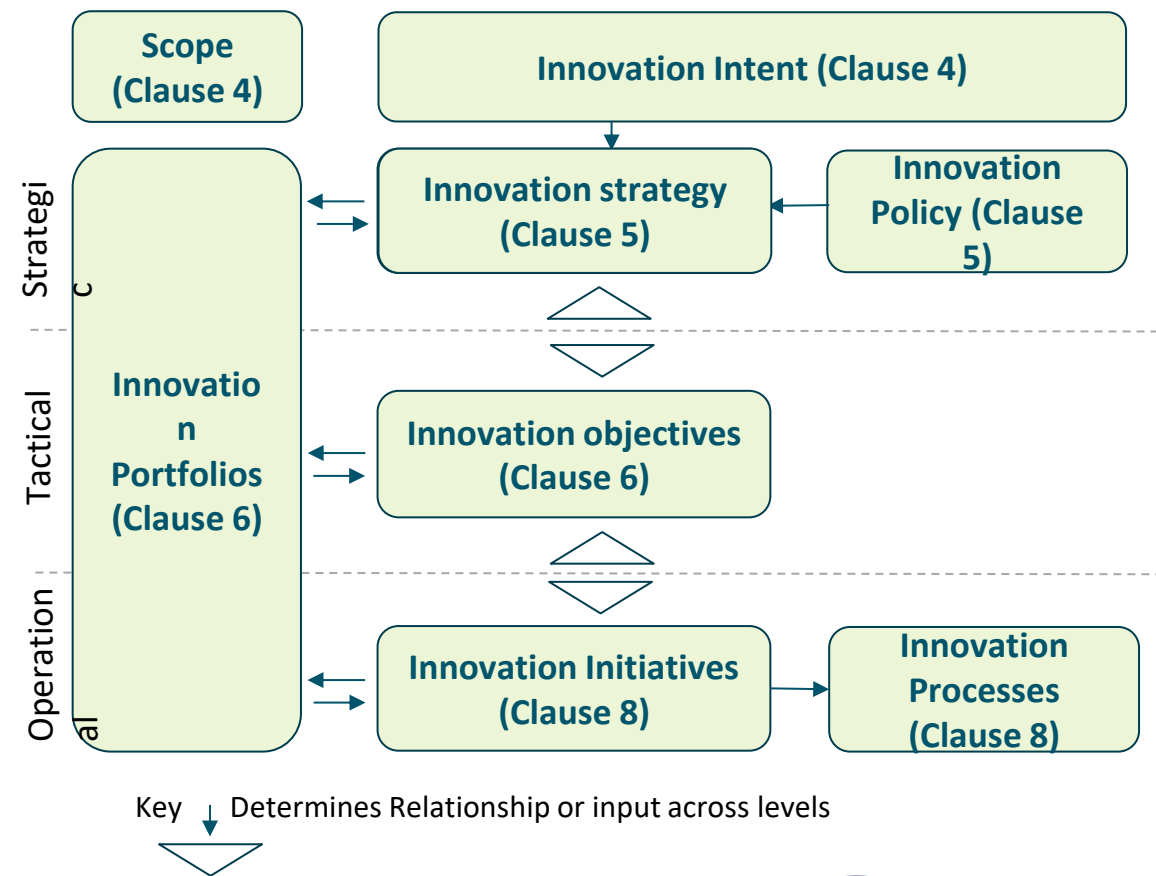

The ISO standard is an international standard that provides a flexible framework adaptable by organizations, allowing for certification by independent bodies

Innovation management system

Management Levels and relationships

With a structured process, the ISO audit which assesses the current organization maturity and relevant evidence to identify maturity level, main gaps, and roadmap for improvement

Approach

During audit

Planning & Onboarding

Auditor assesses the application & schedules onboarding call with organization providing information or pre-requisites & approach

Online Assessment

Key Question	Sub-question	Yes/No/Not Applicable	Score
1. Innovation Strategy	Does the organization have a clear innovation strategy?		
2. Innovation Portfolio	Does the organization have a clear innovation portfolio?		
3. Innovation Process	Does the organization have a clear innovation process?		
4. Innovation Culture	Does the organization have a clear innovation culture?		
5. Innovation Metrics	Does the organization have a clear innovation metrics?		
6. Innovation Governance	Does the organization have a clear innovation governance?		
7. Innovation Resources	Does the organization have a clear innovation resources?		
8. Innovation Partnerships	Does the organization have a clear innovation partnerships?		
9. Innovation Ecosystem	Does the organization have a clear innovation ecosystem?		
10. Innovation Impact	Does the organization have a clear innovation impact?		

Online assessment evaluates key components of the management system through 10 key questions as defined by ISO framework each offering 6 response options

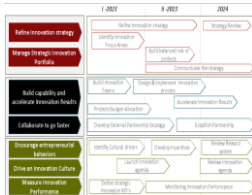

Evidence

- 1. Clearly documented CEO Innovation Intent
- 2. Various Focus area for innovation
- 3. At least 3 Business concepts
- 4. Innovation Portfolio with at least 1 Project of new products, process or technology

Through the revision and analysis of documentation and evidence, the ISO assessment allows to determine ISO compliance through a checklist method

AI generated recommendation

An AI engine provides summary of pre-determined recommendations for closing the identified gaps and complying with ISO requirements

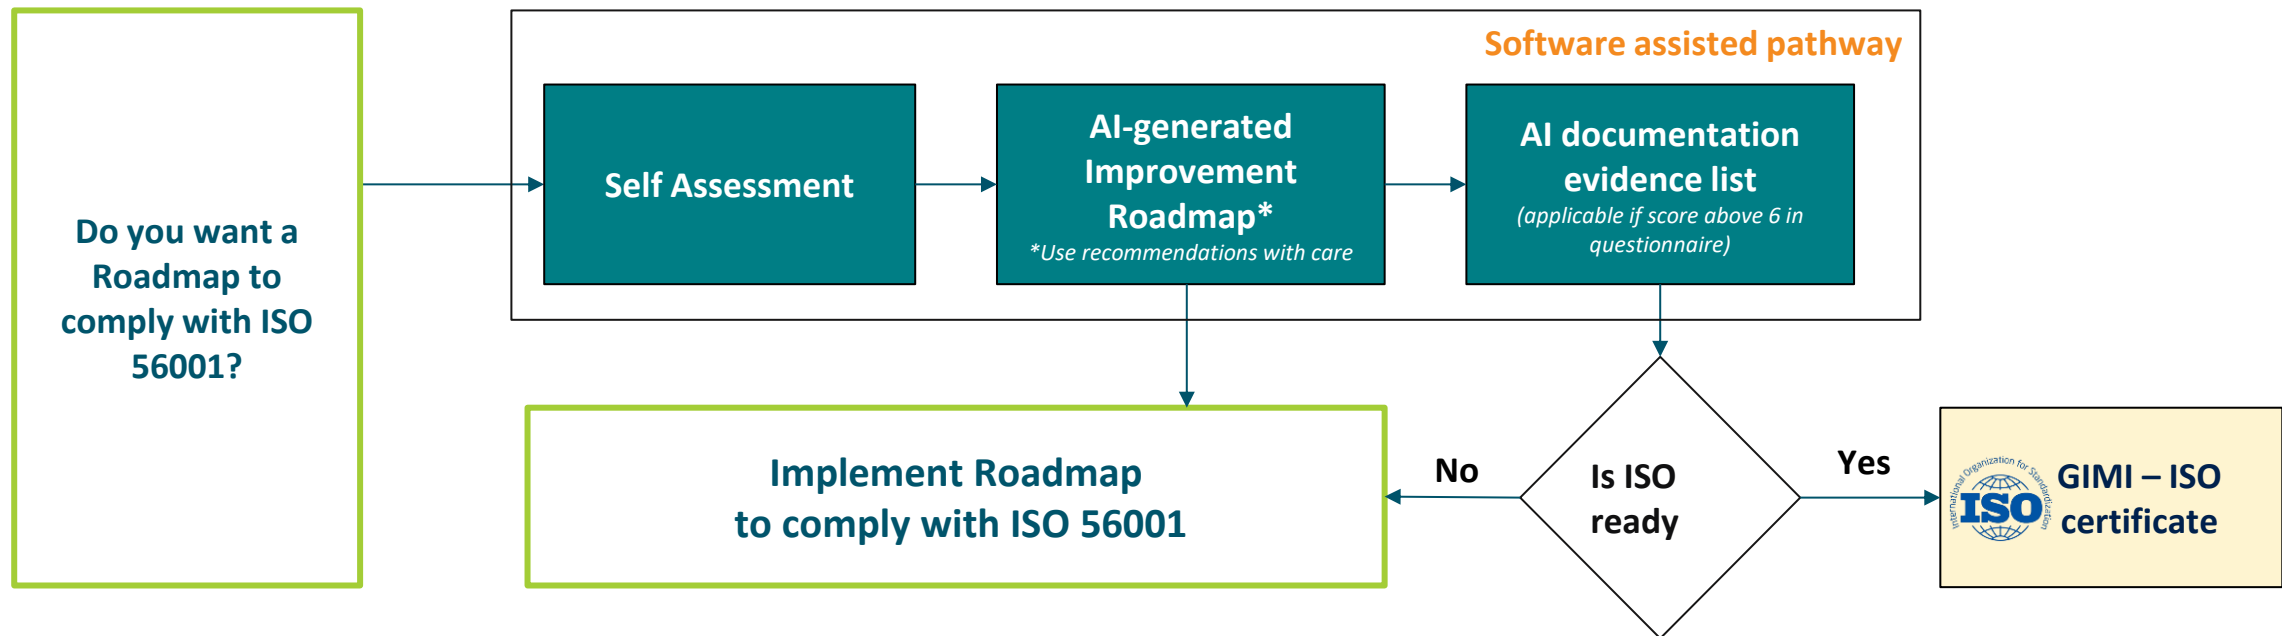

Post Assessment

The auditor refines the report as needed & ships it to the client for final review. The client can opt for Level 3 certification if qualifies through the process

A self assessment-based software solution can help organizations with the ISO certification and compliance

The assessment provides organizations with a series of AI generated recommendations to address gaps, and a roadmap to Build your build an ISO compliant organization

Results

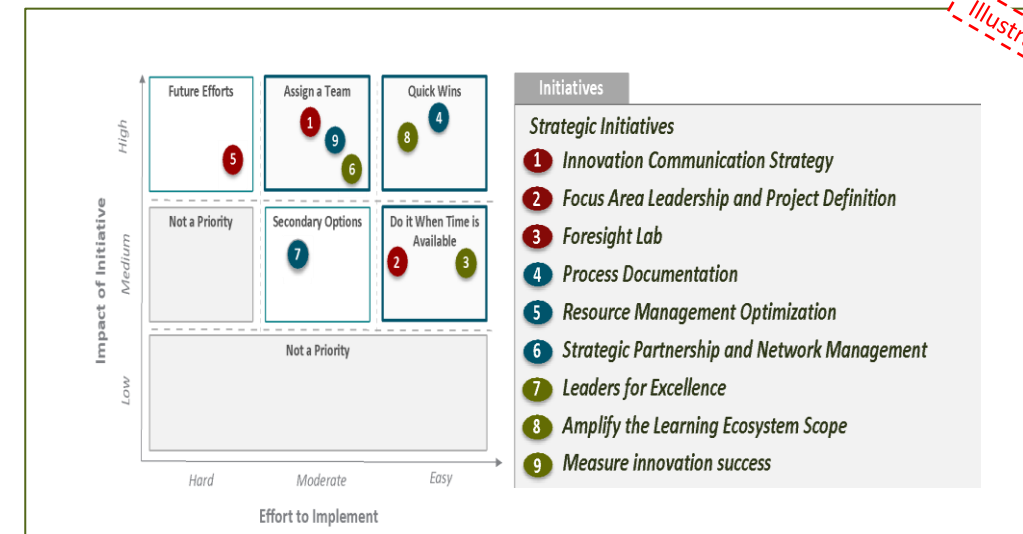

With the assessment, auditors/consultants generate a set of strategic recommendations to advance the organization and prioritize them, resulting in the development of a roadmap that guide the innovation efforts

1. Current Innovation Levels

Key Component	Subcomponent	Key Questions	0	2	4	6	8	10
1. Strategy	1.1 Innovation Intent	Do we have a compelling case for change that gives Innovation a purpose?	•	•	✕	✕	✕	✕
	1.2 Focus Areas	Do we have Growth Areas to focus our Innovation Efforts?	•	•	✕	✕	✕	✕
	1.3 Portfolio Management	Do we have a Dynamic Innovation Pipeline / Portfolio?	•	•	✕	✕	✕	✕
2. Capacity	2.1 Process	Do we have a Concept-to-Customer Innovation Process?	•	•	✕	✕	✕	✕
	2.2 People & Partners	Do we have High Performance Teaming and Partnering?	•	•	✕	✕	✕	✕
	2.3 Resources	Do we have and manage Innovation resources?	•	•	✕	✕	✕	✕
3. Discipline	3.1 Leadership	Do we have Leadership Commitment to Innovation?	•	•	✕	✕	✕	✕
	3.2 Culture	Do we have Entrepreneurial Behaviors?	•	•	✕	✕	✕	✕
	3.3 Metrics	Do we measure innovation?	•	•	✕	✕	✕	✕
4. Performance	4.1 Create Value	How successful are we in creating new value for our stakeholders?	•	•	✕	✕	✕	✕
	4.1 Capture Value	How successful are we in capturing value?	•	•	✕	✕	✕	✕

Illustrative

2. Closing the gaps

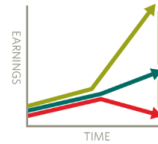

Illustrative

GIMI Organizational Innovation Assessment is designed to recognize current maturity in terms of innovation & how to bridge the gaps, using the best global practices

1 For Whom & Why

Organizations or business units across sectors that have started their innovation journey and aim to enhance their innovation capabilities as a driver for growth

2 What (Methodology)

Key components

Maturity Levels

GIMI's High Performance Innovation Framework focuses on the four core pillars of innovation management: Strategy, Capacity, Discipline and Performance

3 How (Approach)

1. Online Assessment

Assessment Scorecard

2. Interviews

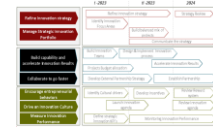

Key Stakeholders

3. Evidence

Internal Documents

4. Roadmap

Strategic Actions

With a structured process, we assess the current innovation state and gather insights from key stakeholders and relevant evidence to identify maturity level, main gaps, and roadmap for improvement

4 Results

1. Current Innovation Level

2. Closing the Gap

3. Roadmap

Area of Focus	Current State	Target State	Gap	Priority
Leadership	Level 1	Level 4	Level 3	High
Capacity	Level 2	Level 3	Level 2	Medium
Discipline	Level 1	Level 2	Level 1	Low
Performance	Level 1	Level 2	Level 1	Low

4. ISO compliant documentation

The results include a comprehensive report covering three main areas: Innovation Maturity Level, Gap Analysis, Innovation Roadmap and ISO documentation

GIMI's innovation assessment will allow you uncover the hidden opportunities for rapid growth by getting insights on your current state and actionable recommendations to bridge the main gaps

For Whom?

Organizations or business units who want to use best world practices to advance its innovation management and drive growth

SME's

Public Organizations

Business Units

Corporates

Why?

Why Do an Assessment?

Is your organization ready to innovate?

Assess and understand your organization's current state of innovation

Do you know what your organization's main gaps are?

Identify gaps and areas for improvement to bridge distance between your current and desired innovation levels

Do you know how to close the gaps?

Discover an improvement punch list and a priority action plan to address and close the identified gaps

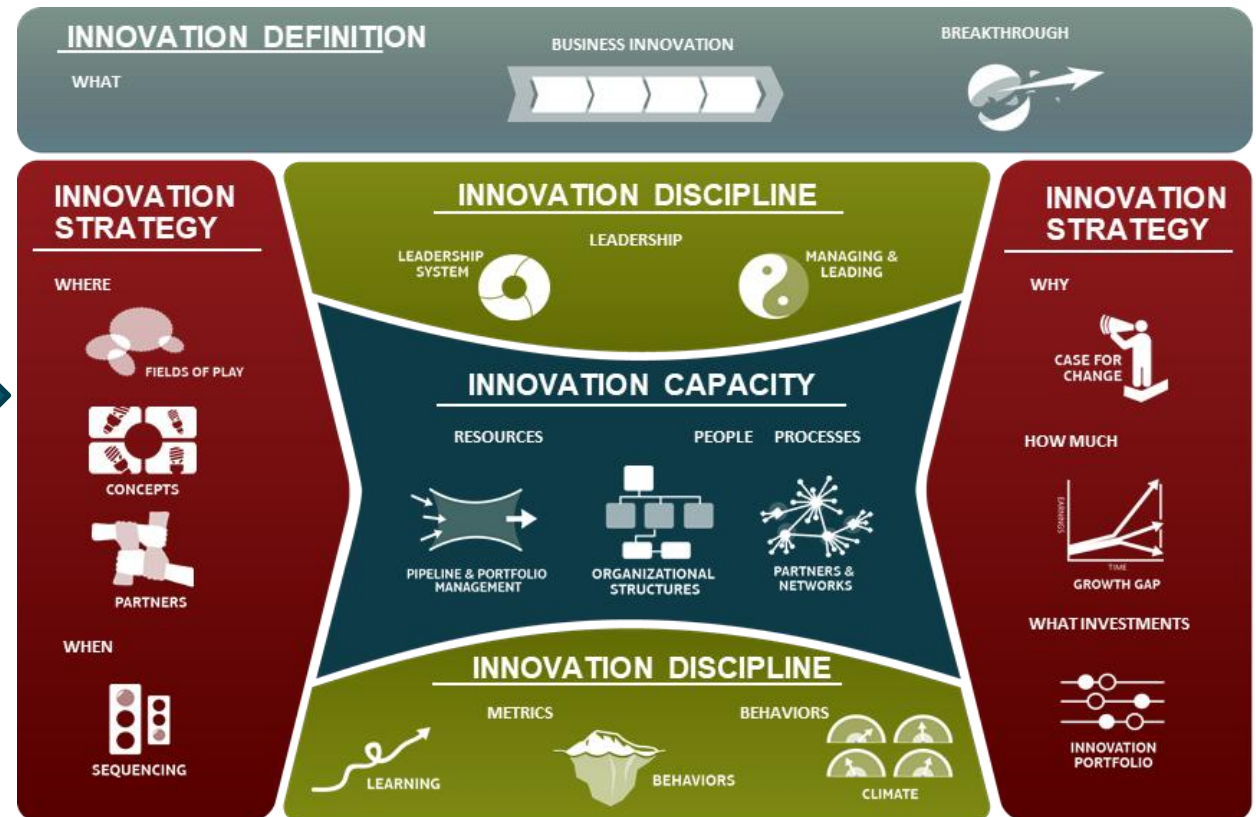

Do you want to be compliant to ISO and receive ISO certification?

Enable the organization to be ISO compliant and obtain the ISO 56001 certification

For over 25 years, GIMI has spread a common language with a High-Performance Innovation Framework-HPI that has been implemented globally and was audited and endorsed as ISO+ compliant

Framework

GIMI's pathway for organizations to prepare for and achieve ISO certification is centered on establishing a robust foundation for innovation management that extends beyond ISO standards

GIMI's journey for Innovation Management Excellence

Small and Medium Organizations

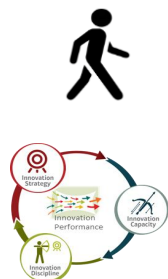

Large Organizations

How can I prepare for ISO 56001?

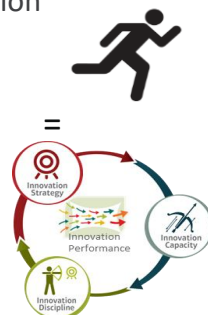

Level 1

Set the innovation purpose and an initial process and commitment for innovation

Level 2

Establish a clear innovation strategy with a portfolio and a structured process and dedicated resources and leadership commitment to innovation

Level 3

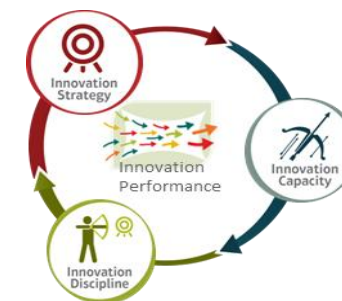

Manage an advanced pipeline/ portfolio with clear metrics and structured process with strong teaming and rewards innovative outcomes

Level 4

Become a recognized innovation leader in the ecosystem with a transformative purpose and strong partnering networks leading industry disruption

ISO framework addresses the "WHAT"

GIMI framework additionally addresses "HOW"

Higher maturity levels of the state of innovation indicate a greater demonstration of commitment, capabilities, and innovation results within the organization making them ISO ready and compliant

Innovation Management

Level 1

Proficient

The organization has a vague, generic purpose and focus for innovation, but lacks clear linkage to strategic objectives or customer needs. The innovation pipeline is basic and poorly defined due to a lack of leadership commitment to a cohesive innovation culture.

Level 2

Master

The organization has a clear and relevant innovation purpose, with multiple focus areas, an intermediate pipeline/portfolio, and a structured innovation process that leverages collaborative teaming and partnering, dedicated resources, and leadership commitment to fostering innovation culture. Measurement metrics align with strategic objectives and customer needs. Innovation is perceived as necessary to achieving a competitive advantage.

Level 3

Proficient

The organization has a compelling and inspiring innovation purpose, advanced focus areas aligned with strategic objectives and customer needs, and an advanced pipeline/portfolio with clear criteria and metrics. The organization employs a structured and collaborative innovation process, with strong teaming and partnering networks, dedicated resources, and a dedicated innovation team. Innovation is seen as meaningful, strategic, and behavior-driven, and innovative behavior and outcomes are recognized and rewarded.

Level 4

Master

The organization is an innovation leader with a distinctive and transformative purpose. Regularly updated focus areas, a dynamic pipeline/portfolio with clear criteria and channels for innovation process management, strong teaming and partnering networks, and a formal evaluation process that rewards and recognizes outstanding innovation results create a supportive innovation culture committed to results. Innovation is seen as an essential way of life.

Certified 56001 organizations

With a structured process, OIA assess the current innovation state & gather insights from key stakeholders & relevant evidence to identify maturity level, gaps, roadmap for improvement

Approach

Planning & Onboarding

An expert auditor prepares the organization for the process by identifying and shortlisting stakeholders, onboarding them

Online Assessment

Online assessment evaluates the key components of the innovation management system through 13 key questions each offering 6 response options

Interviews with Key Stakeholders

The OIA includes interviews with 4 to 5 key stakeholders per Business Unit to gather insights about how the organization manages innovation

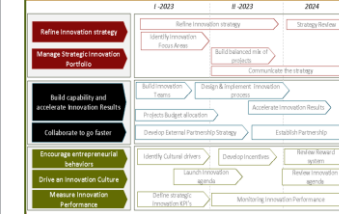

Evidence

1. Clearly documented CEO Innovation Intent
2. Various Focus area for innovation
3. At least 3 Business concepts
4. Innovation Portfolio with at least 1 Project of new products, process or technology

Through the revision and analysis of documentation and evidence, the OIA allows to determine the maturity levels

Roadmap

A detailed roadmap for the organization to close the gap is prepared by experts taking into consideration best practices

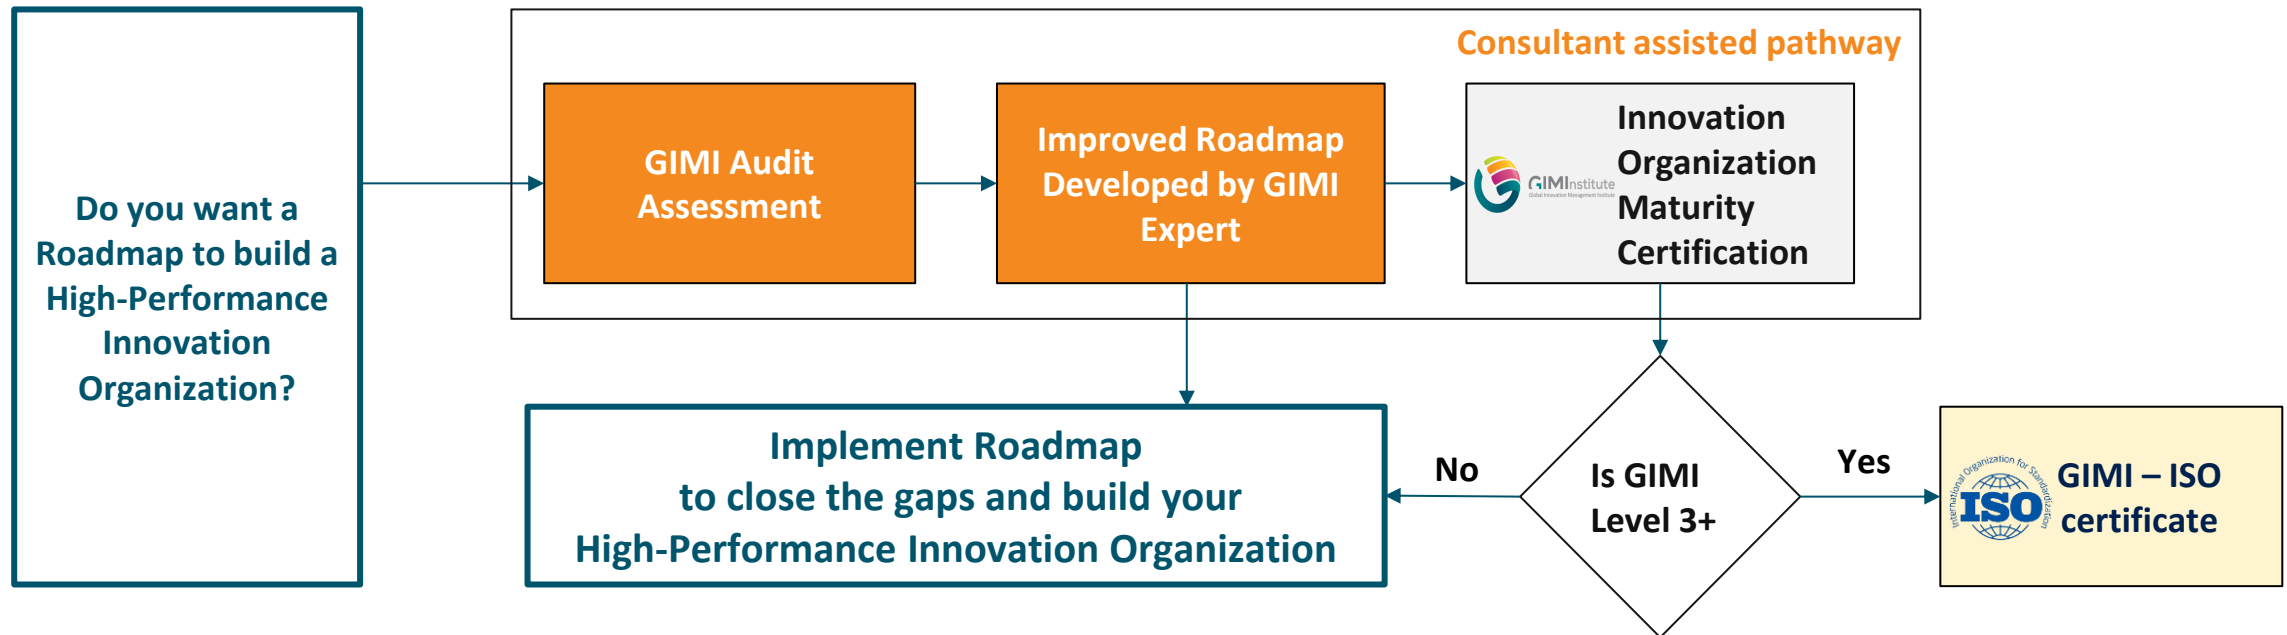

Post Assessment

The expert advisor organizes a strategy workshop to align on the roadmap and obtain leadership commitment. GIMI level-based certificates are issued.

A self assessment-based software solution can help organizations with the ISO certification and compliance

The assessment provides organizations with a series of recommendations to address gaps, and a roadmap to Build your build a High-Performance Innovation Organization

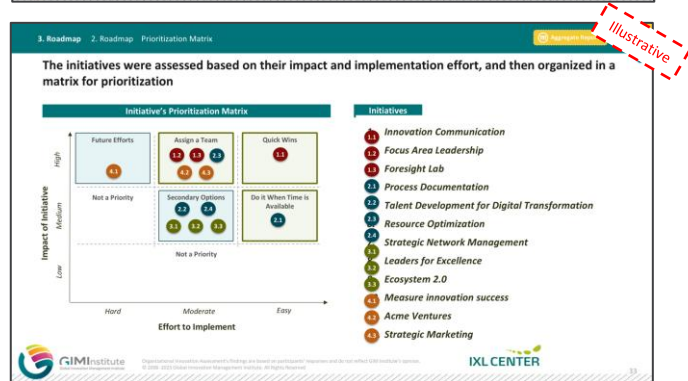

Results

With the assessment, auditors/consultants generate a set of strategic recommendations to advance the organization and prioritize them, resulting in the development of a roadmap that guide the innovation efforts

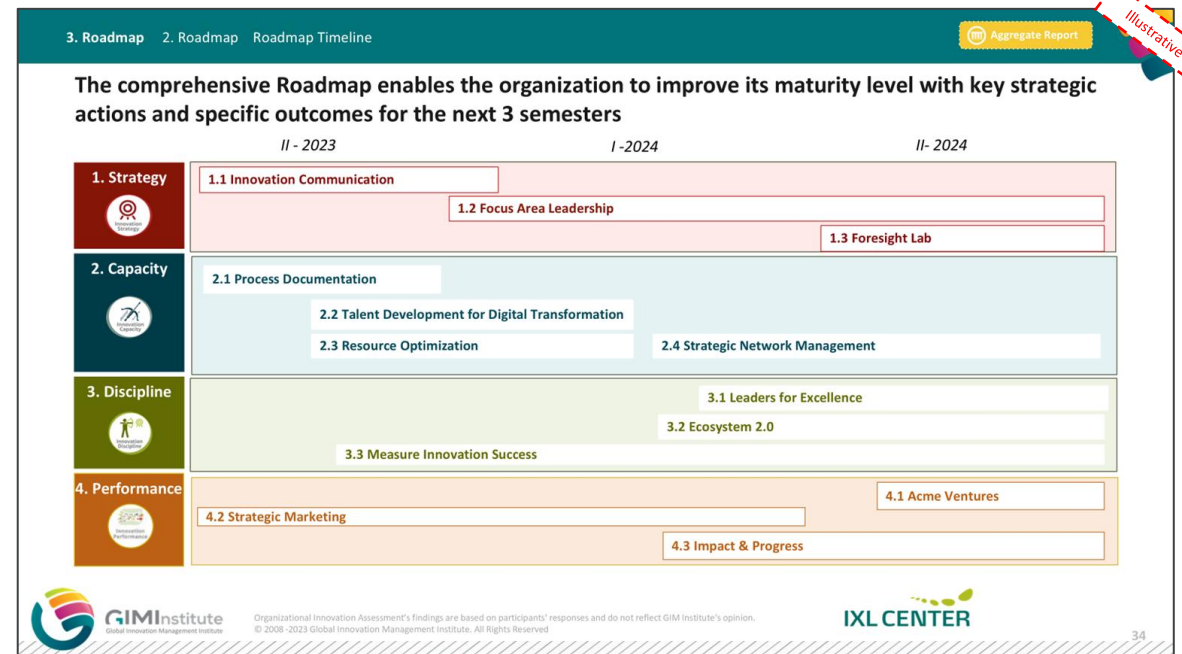

1. Punch list of Recommendations

2. Prioritizing Matrix

3. Roadmap
