

Your credential just became accredited.

FOR GIMI ALUMNI - Certified Innovation Professionals

GIMI is the first and only innovation-management certification body in the world accredited to ISO/IEC 17024 (IAS PCB-169) - the global standard for certifying professionals, recognised across 100+ economies through the IAF Multilateral Recognition Arrangement and aligned to ISO 56001.

WHAT THIS MEANS FOR THE INNOVATION-MANAGEMENT DOMAIN

For years, innovation has been taught - but rarely independently certified. That changes now.

- **It consolidates innovation management as a profession and discipline:** independent accreditation gives innovation management what every mature field has - a rigorous, externally verified standard of competence. It moves innovation from a loose set of practices to a recognised, consolidated discipline and profession, on par with quality, cybersecurity and finance.
- **It matters most in the age of AI:** as AI floods the world with content and claims, independent proof of human competence becomes the scarce, trusted asset - the field now has an infrastructure of trust.

WHAT THIS MEANS FOR YOU

- **Independent proof of your competence:** your credential is no longer only GIMI attesting to your ability - an external authority (IAS) has verified that GIMI certifies people to a rigorous, impartial, globally recognized standard. It is the difference between a certificate of attendance and accredited proof you can do the work.
- **A more valuable credential, at no extra effort:** the credential you already hold just gained international accreditation - you did nothing more, and it is worth more.
- **Global portability:** recognized across 100+ economies through the IAF Multilateral Recognition Arrangement, so your credential travels with you across employers, sectors and borders.
- **Career currency:** accredited certification is a genuine differentiator in hiring, promotion, internal mobility and consulting - concrete evidence of capability rather than a line on a CV.
- **Pioneer standing:** you are among the first professionals in the world to hold an accredited innovation credential - a distinction that only the early cohort will ever have.
- **Future-proofing in the age of AI:** as AI makes surface-level "expertise" easy to generate and fake, an accredited credential is durable, independent proof of real human competence - exactly what employers and clients will increasingly ask for.
- **Professional identity and belonging:** you are part of a profession that now has a recognized, accredited standard - with a growing global network of accredited peers, standards-aligned knowledge (ISO 56000, IMBOK), events and thought leadership.
- **A credential that keeps appreciating:** as the accreditation becomes known across the market, the recognition and weight of your credential grows with it.

HOW TO ADD IT ON LINKEDIN (WORDS ONLY)

- **Add the section:** on your profile, click "Add profile section" -> "Recommended" -> "Add licenses & certifications" (or the + if you already have it).

- **Fill in the form:** Name: "Certified Innovation Professional (CIP) - accredited to ISO/IEC 17024" - Issuing organization: Global Innovation Management Institute (GIMI) - Credential URL: your GIMI credential or certificate link. (There is no description box, so put the accreditation in the name.)
- **Reinforce it:** add to your headline and About - "Certified Innovation Professional (GIMI), accredited to ISO/IEC 17024" - and share a post, then pin it to Featured.

Proud to be accredited - share the news and add it to your profile today.
